

Senior Portfolio

Sadeem Alanazi

Marymount University

IT 423-A

Dr. Murphy

26 April, 2026

Transmittal Letter

Subject: Submission of Senior Portfolio

Dear Professor,

I am submitting my Senior Portfolio that highlights my professional development, academic background and technical skills during my time at Marymount University. My studies, technical skills, soft skills, projects and career goals are included in the paper.

I appreciate your consideration and time. If you have any questions, do not hesitate to contact me.

Regards,

Sadeem Alanazi.

Executive Summary

Sadeem Alanazi's academic and technical development as an Information Technology senior at Marymount University is displayed in this portfolio. A summary of her education, technical skills, and professional competencies is provided.

The portfolio covers important projects, such as web development, Windows Server management, and AWS cloud security configurations. It also includes her career goals and preparation for positions in cybersecurity and IT support.

Links to GitHub repositories as well as documented professional work provide supporting evidence, demonstrating both real world experience .

About Me

I am a senior at Marymount University studying Information Technology with a minor in Cybersecurity. I am currently completing my degree and have developed experience through labs and projects involving Windows Server, networking, and cloud security.

I have been able to develop practical skills in system setup, troubleshooting and understanding how secure environments are created and maintained due to my higher education in operating systems, networking, and cybersecurity at Marymount University.

I am mainly interested in roles such as IT Support Specialist, System Administrator, or Cybersecurity Analyst. What attracts me to these positions is the chance to fix technical problems, improve system efficiency and protect systems from potential dangers. I find enjoyment in troubleshooting systems and learning how proper system design can prevent threats.

I have developed attention to detail, which is one of my main skills. Setting up systems, like Windows 2019, without focusing on the small things can result in serious problems, such as failing to fully download the system.

The Saudi Arabian Cultural Mission granted me a full scholarship, which show my commitment to my studies. For the summer of 2026, I'm searching for internship opportunities where I may use my skills in a professional setting, gain hands-on experience, and develop as an IT professional.

My long term goal is to pursue my career in an entry-level IT position where I can gain experience system administration and support.

Knowledge Acquisition

Relevant coursework includes:

- Operating Systems
- Cybersecurity Fundamentals
- Networking
- Cloud Computing

I have gained essential skills system setup, troubleshooting and security deployment through these courses. AWS, Windows Server, and virtualization tools labs provided me with hands on experience.

Technical Skills

Operating Systems:

- Windows Server 2019
- Linux (Fedora)

Networking:

- Cisco Packet Tracer
- TCP/IP, DNS, DHCP

Security:

- IAM Policies (AWS)
- Security Groups
- Basic Zero Trust Concepts

Tools:

- GitHub
- VirtualBox / UTM
- PowerShell

Programming:

- Python (basic)
- HTML/CSS

Professionalism

Throughout my academic experience, I have displayed professionalism during my education by working in groups, organizing my time, and solving technical problems.

I worked with other students and assisted with group projects by organizing assignments and ensuring deadlines were met. Additionally, I have improved my communication skills through presentations and written reports.

I pay close attention to details, especially when setting up systems when small errors occur during the process that may result in serious issues.

These experiences have helped me gain a professional mindset that I will carry into my career.

Projects

Project 1: MovieMatch Website

I developed a web application called MovieMatch. The website includes a chatbot for interaction and allows users explore movie recommendations. This project helped me expand my development skills and acquire an understanding of the design and structure of user interfaces

Tools used:

- HTML
- CSS

Project 2: Windows Server 2019 Setup

I used VirtualBox to install and set up Windows Server 2019 for this project. I provided IP addresses, configured networking, and confirmed system connectivity. I focused on configuring network settings like IPv4 addressing, default gateway, and subnet mask and practiced using commands like ipconfig.

Tools Used:

- VirtualBox
- Windows Server 2019

Project 3: Network Design

I used Cisco Packet Tracer to create and set up a network for the project. Several devices, including switches, routers, and client computers, were connected on the network. I set up IP addressing, subnet masks, and default gateways. I also used commands like ping to test connectivity

Tools Used:

- Cisco Packet Tracer
- TCP/IP networking

Work Experience

Although I do not have any official IT work experience, my academic work has given me transferable skills that include problem-solving, communication, and time management. These skills are directly applicable to IT positions that involve system management and support.

Career Path

I aim to start out in an entry level IT position like system administrator or IT support. Within the next five to ten years, I would like to earn advanced certifications and improve my understanding regarding cloud security and security analysis. I am actively searching for summer 2026 internship opportunities to expand my professional skill.

Resume

SUMMARY

Detail-oriented and innovative Information Technology student at Marymount University with a minor in Cybersecurity. Experience with web development, Python scripting, and network security; has been involved hands-on in applying the fundamentals of cybersecurity. Eager to put technical skills to work by developing secure and efficient solutions. Open to opportunities that will enhance my skills and allow me to make a difference in the IT security domain.

EDUCATION

Marymount University, Arlington, VA
Bachelor of Science in Information Technology
Minor in Cybersecurity
Expected Graduation: Fall 2026

SKILLS

Technical Skills

- Tools: Microsoft Office Suite
- Security: Network security, cybersecurity principles, AWS Security
- Programming: Python, HTML, CSS, JavaScript
- Cloud: Microsoft Azure Cloud concepts

Soft Skills

- Problem-solving
- Time management
- Critical thinking
- Communication

EXPERIENCE

Cybersecurity Principles (Marymount University)

Academic Project

- Researched on major attack vectors like malware and cybercrime.
- Conceived security policies that will protect populous and entities from losing instantaneously.

Python Scripting (Marymount University)

Academic Project

- Wrote Python scripts to automate the process of data analytics and solution to information technology problems.
- Utilized data science methodologies for processing and deriving interpretation from datasets.

Web Development (Marymount University)

Academic Project

- Complex websites were built with HTML, CSS, and JavaScript.

- Paid special attention to responsive design and user friendly interfaces.

CERTIFICATIONS

- AWS Security
- Microsoft Azure
- Cisco Networking Academy

LANGUAGES

- Arabic
- English
